PROFILE

Computer Science Engineering graduate with a strong interest in analytics, mathematics, and data-driven problem solving. Passionate about identifying patterns, understanding system behaviour, and solving complex challenges through analytical thinking and technology. Interested in building impactful solutions within analytics-focused domains, with long-term aspirations in sports analytics.

EXPERIENCE

88 Pictures

2026

Pipeline Intern

India

- Worked within a highly restricted production environment with secure operational protocols and limited internet accessibility
- Gained practical exposure to **Python, Linux systems, databases, and collaborative workflow pipelines** in a professional production setup
- Designed and implemented an **Elastic Dashboard** to monitor artist workflow performance and improve operational visibility across the production floor
- Collaborated with technical and production teams while adapting to structured industry-standard workflows and delivery processes
- Strengthened problem-solving, adaptability, and communication skills through real-time production coordination and troubleshooting

PROJECTS

DevLog CLI

github.com/joeljoymon/devlog-cli

A command-line developer journal and task tracker built with Python and published as a live package on PyPI (pip install devlog-cli-joel).

- Built 4 CLI commands (log, list, done, summary) using Click with JSON-based data persistence
- Wrote 18 automated tests using pytest, covering positive and negative edge cases
- Configured a CI/CD pipeline via GitHub Actions to auto-run tests on every push
- Packaged and published to PyPI following semantic versioning and Python packaging standards
- Followed full IT workflow: GitHub issues as sprint backlog, atomic commits, and versioned releases

Tech: Python, Click, pytest, GitHub Actions, PyPI, JSON

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering

2022 – 2026

SGPI/CGPA: Above 8

India

- **Relevant Coursework:** Data Structures, Databases, Operating Systems, Web Development, Artificial Intelligence
- **Areas of Interest:** Analytics, Problem Solving, Data Analysis, Sports Analytics

Higher Secondary Certificate (HSC)

2022

Score: 63%

India

Secondary School Certificate (SSC)

2020

Score: 83%

India

SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Frameworks & Technologies: React.js, Node.js, Express.js, MongoDB, Elastic Stack

Tools & Platforms: Linux, GitHub, VS Code, MySQL, PostgreSQL, Overleaf

Core Strengths: Analytics, Problem Solving, Team Collaboration, Adaptability, Logical Thinking

CAREER OBJECTIVE

Seeking opportunities to strengthen technical foundations and gain hands-on industry experience in analytics and technology-oriented roles. Focused on continuous learning, practical problem solving, and building scalable analytical thinking capabilities that can create meaningful impact in the IT industry.

STRENGTHS

Analytical Thinking

- Strong interest in mathematics, logical reasoning, and identifying underlying patterns behind complex problems

Adaptability & Accountability

- Accepts mistakes responsibly, focuses on continuous improvement, and adapts effectively to challenging environments

Goal-Oriented Mindset

- Driven towards building expertise in analytics and pursuing long-term goals within sports analytics and technology
